

Business Development Internship Lausanne, Switzerland

About SUN bioscience

SUN bioscience SA is an innovative bioengineering start-up, standardizing stem cell-derived miniature organ cultures through its cutting-edge laboratory technologies. We are based in Lausanne on the shores of the Swiss Léman Lake, deemed the heart of the Health Valley. SUN bioscience was founded in 2016 by an international team of bioentrepreneurs, who are inspired by the gift of nature and surrounded by the creations of science.

Within the company, the main targets are to:

- Improve the customer experience of organoid cultures, by providing 3D cell culture technologies that are as easy to use and reproducible as the current gold standard 2D platforms.
- Standardize the culture of pluripotent and adult stem cell derived organoid cultures, specifically for retinal organoids and intestinal organoids.
- Become the number one supplier of platforms for organoids and organoid cultures in Europe.

Your Responsibilities

SUN bioscience's Business Development Intern program is challenging and rewarding at the same time. You will gain an inside perspective on biotech startups and acquire project management as well as functional expertise. Daily responsibilities can include negotiating with business partners, supporting management through business research, planning and development, assisting in financial planning or the preparation of documents for strategic decisions.

Who we are looking for

Ideally you are a current MBA student with an expected graduation date of mid 2017 or later. You have prior experience (2-3 years) in corporate pharmaceuticals involving project management, research & data analysis, strategy development and implementation. You are a strong strategic thinker with attention to detail as well as a hands-on mentality. The internship requires independence, ambition and professionalism. A high interest in the startup environment, fluent English and French and an international background distinguish you from other applicants. Flexibility, endurance and speed, also in high pressure situations, are of paramount importance to you. Furthermore, you are geographically mobile with the possibility to join the company full-time for a minimum of 2-3 months or part-time for 6 months in Lausanne.

Join an execution-driven dynamic start-up environment alongside our highly motivated management team. Send your CV and a short cover letter (1 page) via our online application form. We are hiring now!
